S023/042 ~~116~~

Tom,

Would you please follow up your verbal extension to Mr. Jensen with a letter for my signature? Because this is an outstanding compliance issue, we need to formally document our granting this time extension to March 9th. Thanks a bunch.

W.

Neal met with Ron Tessner and myself at 10:00AM and discussed the fact he had misread the letter we sent him and as such would be able to meet the March 9th deadline instead of the Feb. 11th deadline for submittal of his LMO and posting of his interim bond of 20,000 dollars. The BLM had no problem with this deadline. We had requested 14,000 dollars interim bond (7acres x2,000/acre) and he stated he wanted wiggle room to expand to ten acres or bond for 20,000 dollars. I stated we will review the plan and let him know if it is adequate since the 14,000 dollar amount was only a rough estimate for interim purposes. I also informed him of his track record being less than desireable and we viewed his activities with some concern!

I stated that Lynn would fax him a seed mix at 754-5200 and that riipping the clay layer below the travertine he mines prior to laying down topsoil would be beneficial as well as drill seeding the seed would be good reclamation practice.
